Responses (24 of 27)

Joseph was great!

Joseph is a wonderful TA. Everything I did not understand in lecture he went over and gave us worksheets with problems that were not of ridiculous difficulty. He would walk around and answer individually every question we had. Also he went out of his way to make extra review sessions that were helpful to many people.

He was always available for questions and really cared about his students.

Office hours were very helpful and he explained things very well.

By far the best and most useful TA I have ever had (and I did not even utilize all the resources he offered). he's a great TA and very helpful.

none

Great TA. The best I've had so far

Great dude. Helped more than the professor. Deserves more than what he is being paid.

Literally the greatest math TA I have ever had. Super helpful and always makes himself available for student help.

My TA really did the most to make sure our questions were always answered and we were prepared the best we could be. He's honestly the best TA I've had by far because you can tell he genuinely cares about our success.

One of the most understanding, prepared, and intelligent TA's I have encountered.

By far the most flexible and well-spoken math TA I've had thus far; Joseph always prioritized condensing lecture information into understandable chunks for us to reference later.

Joseph was always kind and very clear with his explanations. I love that he was always willing to work extra in order to help the students.

Was very helpful and taught the subject better than the instructor

Instructor answered any questions promptly and effectively

Joe is the best TA I have ever had. He explains things so well, if I am ever confused in lecture I never worry because I know that Joe will just reteach the material in discussion in a way that everyone understands. Joe was always in office hours willing to help and I scheduled numerous 1 on 1 zooms with him which he always made time for. He was always prepared, well versed on the material, and would offer us so many resources to get help. I would recommend Joe over any TA and I am so sad that I can't have him for my math next semester. Joe is a great TA and just an overall amazing human being who wants so badly for everyone to do well. Thanks for everything Joe.

The grad assistant was very helpful this semester. He constantly asked for our opinions on what we wanted to work on and constantly helped improve our understanding of topics. I always left discussion or lab feeling like I understood more of the material than going in. Honestly he was the best TA I've had in my 3 years here.

Great TA, learned alot and enjoyed lab/discussion

He was very friendly and was willing to help the students with any problems they had.

My TA was truly exceptional, he was always willing to help, and would explain everything in ways that just made sense, and would try a different way if you did not get it the first time. He was always available to meet if you needed more help on stuff even outside of office hours and always seemed to truly care about his students and how they were doing. I truly hope he becomes a Professor because any student would be lucky and would benefit greatly to have him as a proffessor.

Joe was one of the best TA's I've had at UD. He truly cares about all of his students and is more than welcome to meet for extra help outside of office hours. He always goes the extra mile for his student's success.

This man is amazing. He is the one that got me through this class. I would go to office hours a lot and he would help to understand how to actually do all of the problems. He is my favorite TA I have had while here by far. He would hold very helpful review sessions and simplified what we were learning in an organized, concise way. 10/10 would recommend

Helped me in a one on one review session the weekend before the exam, it was really helpful and is probably the only reason I passed the exam
