Responses (7 of 20)

Awesome professor who genuinely cares about his students. Extremely accommodating to every students needs (including having to make up quizzes/homework/ect for sports), and lectures are well paced and entertaining. One of the best math professors I've ever had.

Professor Nakao has been the most helpful, organized, and accommodating professor that I have had at the University of Delaware. He has been one of the only professor that I have had that has truly cared about my personal performance in a class and challenged me to be the best I could be within the class. Professor Nakao is a professor that I would recommend to any other student who attends the University of Delaware because he made a very difficult course as manageable as possible. I was incredibly impressed with my experience in his class and feel as though I would not have learned as much nor been able to be as efficient with a different professor while taking MATH221.

AMAZING PROFESSOR. I USUALLY DO NOT EVEN WRITE ANY COMMENTS FOR EVALS, BUT HE DESERVES IT!

This professor has always been very helpful and always willing to go above and beyond to help me if I have ever struggled in this course. Professor Nakao explains the material in a clear and concise way so that you can understand it well. If you do not understand it, he will do anything he can to make sure you understand it through different methods of teaching style. Out of every professor I have had class with at Delaware, he hands down the most passionate about teaching his class and the success of his students. Only positive things to say about professor Nakao.

Very good teacher always prepared and very good with content and with students.

Awesome math instructor! Highly recommend.

Overall great instructor who really cares and makes sure everyone has a chance to understand the material and pass
