Good at math

I really enjoyed this discussion class. Joseph was a great teacher and I found him to be more helpful than my professor. He was always very prepared for class, and I really liked his method of having us use the chalkboard to go over the problems after he gave a little review of what we learned (frequently adding in helpful tips on how to do that type of problem). He was friendly and seemed to genuinely care about his students, giving advice rather than just in terms of being successful in MATH221. I really have no complaints for the discussion group led by Joseph and think he did a wonderful job.

Joseph is an amazing TA and I loved going to discussion class. He made everything very clear and easy. Oral review sessions were so helpful.
